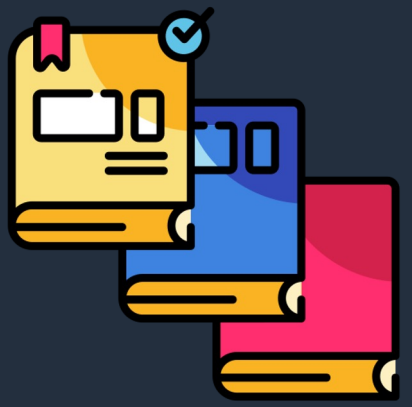
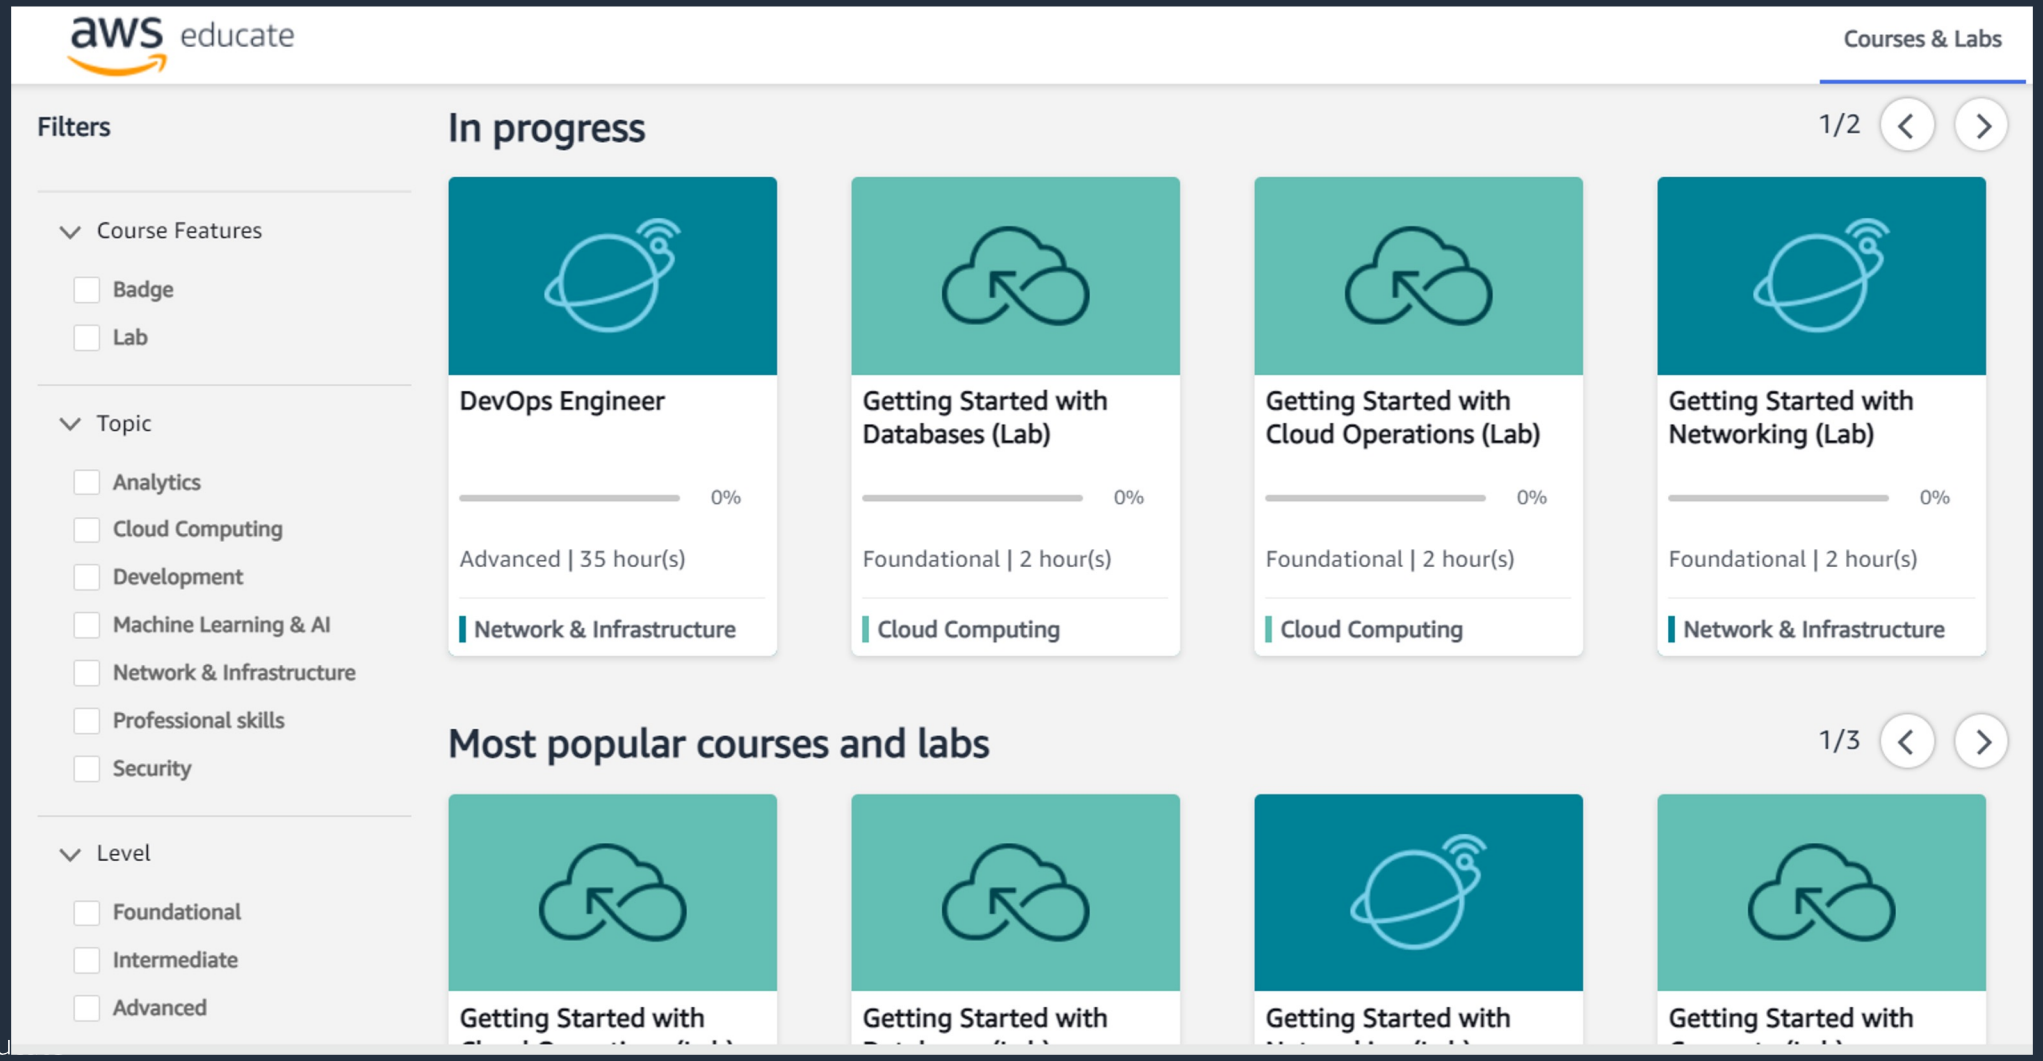
What is AWS Educate ?

Online cloud computing learning platform



Courses and Lab are available for every register

Courses & Labs



AWS Educate Cloud Badges

Students can earn three new AWS Educate cloud badges that meet them where they are in their cloud journey.

- **Cloud Explorer Badge**: Students who are newer to the cloud can start here by completing 10 challenges exploring concepts like algorithms, programming, and cybersecurity through real-world examples.
- **Cloud Inventor Badge**: Students can keep growing their knowledge with 10 more in-depth challenges on cloud technology, such as how variables and big data are used today.
- **Cloud Builder Badge**: For students who are ready to build, this badge includes 14 challenges about the AWS console and services, giving them hands-on experience with AWS by building a website and chatbot.
